● ARIA control has no label.

A label (or name) linked to the control allows screen readers to voice the label correctly when reading the control. To add a label do one of the following:

- Add an aria-label attribute
- Add an aria-labelledby attribute

[WCAG 2.2 A 4.1.2](#)

```
<button type='button' role='combobox' dir='ltr' data-state='closed' data-placeholder="
class=' flex w-full it...' style='background-color:...' aria-controls='radix:r5:' aria-
expanded='false' aria-autocomplete='none'>...</button> line 364
```

● HTML form control has no accessible name.

A label (or name) linked to the control allows screen readers to voice the label correctly when reading the control. To add a label do one of the following:

- Use a label element with the for attribute set to the ID of the form control
- Wrap a label element around the form control
- Add a title attribute
- Add an aria-label attribute
- Add an aria-labelledby attribute

● Ensure that text and background colors have enough contrast.

Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background.

- The contrast ratio should be 3.0 or more for 18 point text, or larger
- The contrast ratio should be 3.0 or more for 14 point bold text, or larger
- The contrast ratio should be 4.5 or more for all other text

[WCAG 2.2 AA 1.4.3](#)

The text color to background color contrast ratio after composition is:

- 🟡 The CSS outline or border style on this element makes it difficult or impossible to see the link focus outline.

Do not remove the default outline style, and change any border styles to avoid obscuring the focus outline around focusable elements. See :focus-visible for more information. Using a border or outline style that obscures the focus ring causes problems for keyboard-only users in:

- Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls)
- Firefox (obscures the focus indicator on links)
