Accessibility

This section shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

Level A

5 issues on 1 pages

● Links must have an accessible name.

A link name allows screen readers to voice what the links does. If there is no link content, or the link content is hidden by CSS, screen readers have nothing to read, so read out the URL instead. To add a name do one of the following:

- Add text between the a element start and end tags
- Add an aria-label attribute
- Add an aria-labelledby attribute
- Add an img alt attribute labeling the link if it contains an img element

[WCAG 2.2 A F89](#)

```
<a href='/' class='flex items-cent...'><svg width='24' height='24' viewBox='0 0 24 24' fill='none' stroke='currentColor' stroke-width='2' stroke-linecap='round' stroke-linejoin='round' class='lucide lucide-h...'>...</svg></a> line 373
```

<https://www.compleohealth.com/services/screening-programmes>

● SVG elements with graphic role attributes must have an accessible name.

SVG elements with `role=img`, `role=graphics-document` or `role=graphics-symbol` need an accessible name provided by the SVG `title` element or an ARIA label.

[WCAG 2.2 A 1.1.1](#)

```
<svg stroke='currentColor' fill='currentColor' stroke-width='0' role='img' viewBox='0 0 24 24' class='h-5 w-5 text-w...' height='1em' width='1em'><path d='M20.447 20.452h-3...'></path></svg> line 373
```

<https://www.compleohealth.com/services/screening-programmes>

● The element `button` must not appear as a descendant of the `a` element.

An interactive control nested inside another interactive control is not voiced correctly by screen readers, and its name role and state is ignored.

[WCAG 2.2 A 4.1.2](#)

```
<button class=' btn-base focus-...'><div class=' flex flex-col ...'><div class=' bg-white/20
rou...'>...</div><div class=' flex flex-col ...'>...</div></div>...</button> line 373
```

```
<button class=' btn-base focus-...'><div class=' flex flex-col ...'><div class=' bg-compleo-
deep...'>...</div><div class=' flex flex-col ...'>...</div></div></button> line 373
```

```
<button class=' btn-base focus-...'>Contact Us</button> line 373
```

<button class=' btn-base focus-...'>Contact Us</button> line 373
```

<https://www.compleohealth.com/services/screening-programmes>

- This skip link is broken. The target anchor does not exist or is commented out.

The anchor after the # symbol points to a non-existent ID on this page, so nothing happens when it's clicked. In most cases the target ID has been removed accidentally and should be reinstated.

[WCAG 2.2 A 2.4.1](#)

No element with `id='main-content'`

```
<a href='#main-content'>Skip to main content</a> line 342
```

Level AA

2 issues on 1 pages

🟡 Ensure that text and background colors have enough contrast.

Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background.

- The contrast ratio should be 3.0 or more for 18 point text, or larger
- The contrast ratio should be 3.0 or more for 14 point bold text, or larger
- The contrast ratio should be 4.5 or more for all other text

[WCAG 2.2 AA 1.4.3](#)

The text color to background color contrast ratio after composition is:

2.97 with color: rgb(255,255,255) background: rgb(0,169,144) font-size: 12pt font-weight: 600

`<span class=' text-sm sm:text...'>VIEW</span>` line 373

2.66 with color: rgb(229,246,243) background: rgb(0,169,144) font-size: 9pt font-weight: 500 opacity: 0.9;

`<span class=' text-xs font-me...'>Equipment</span>` line 373

2.97 with color: rgb(255,255,255) background: linear-gradient(to bottom right , rgb(0,169,144) , rgb(0,169,144) , rgb(15,46,46)) font-size: 12pt font-weight: 600

`<button class=' btn-base focus-...'>Contact Us</button>` line 373

<https://www.compleohealth.com/services/screening-programmes>

🟡 The CSS outline or border style on this element makes it difficult or impossible to see the link focus outline.

Do not remove the default outline style, and change any border styles to avoid obscuring the focus outline around focusable elements. See :focus-visible for more information. Using a border or outline style that obscures the focus ring causes problems for keyboard-only users in:

- Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls)
- Firefox (obscures the focus indicator on links)

[WCAG 2.2 AA F78](#)

outline-color: matches background

`<button class=' btn-base focus-...'><div class=' flex flex-col ...'><div class=' bg-white/20 rou...'>...</div><div class=' flex flex-col ...'>...</div>...</button>` line 373

outline-color: matches background

```
