Action required
To verify ownership of this identity, DKIM must be configured in the domain's DNS settings using the CNAME records provided. To complete configuration of your custom MAIL FROM domain, update the DNS settings using the MX record provided. Amazon SES will continue to use the default MAIL FROM domain until the presence of this record has been verified.

Summary

Identity status	Amazon Resource Name (ARN)	AWS Region
Verification pending	arn:aws:ses:eu-west-2:635806369864:identity/compleohealth.com	Europe (London)

Recommendations (0) Info

Check for recommendations

This static table lists high-impact issues found for this identity. If you implement the provided solution, refresh the table by selecting Check for recommendations to ensure it's no longer listed. By enabling Virtual Deliverability Manager, this table will dynamically refresh with automatic status updates.

Search recommendations

Impact	Age	Recommendation/Description	Last checked	Resolve issue

No recommendations found
Recommendations are available only for verified domain identities. Verify your identity in order to **Check for recommendations**.

DomainKeys Identified Mail (DKIM) Info

Edit

DKIM-signed messages help receiving mail servers validate that a message was not forged or altered in transit.

DKIM configuration	DKIM signatures
Pending	Enabled

Easy DKIM

DKIM current signing length	DKIM next signing length	Last generated time
RSA_2048_BIT	RSA_2048_BIT	September 11, 2025 at 12:48 (UTC+01:00)

Publish DNS records

After you've created your domain identity with Easy DKIM, you must complete the verification process with DKIM authentication by copying the following generated CNAME records to publish to your domain's DNS provider. Detection of these records may take up to 72 hours. For more information, see Verifying a domain identity with DKIM and Easy DKIM.

Type	Name	Value
CNAME	j5m2bpsw3o4rkjjlmm6xiw7ofgivt3u5._domainkey.compleohealth.com	j5m2bpsw3o4rkjjlmm6xiw7ofgivt3u5.dkim.amazonses.com
CNAME	qcajauqdrofjsmxhhtjomxx3b4zgijho._domainkey.compleohealth.com	qcajauqdrofjsmxhhtjomxx3b4zgijho.dkim.amazonses.com
CNAME	32ma7qb7ghjazy2jfqjrhhrkmeext2p5._domainkey.compleohealth.com	32ma7qb7ghjazy2jfqjrhhrkmeext2p5.dkim.amazonses.com

Custom MAIL FROM domain Info

Edit

Messages sent through Amazon SES will be marked as originating from your domain instead of a subdomain of amazon.com.

MAIL FROM configuration	MAIL FROM domain	Behavior on MX failure
Pending	mail.compleohealth.com	Use default MAIL FROM domain

Publish DNS records

To configure this domain as your MAIL FROM, the following MX and SPF records must be copied and published to your domain's DNS provider. Detection of these records may take up to 72 hours. For more information, see Configuring a MAIL FROM domain.

Type	Name	Value
MX	mail.compleohealth.com	10 feedback-smtp.eu-west-2.amazonses.com
TXT	mail.compleohealth.com	"v=spf1 include:amazonses.com ~all"

Download .csv record set

Domain-based Message Authentication, Reporting, and Conformance (DMARC)

DMARC specifies how email servers should handle messages that fail the authentication checks.

Publish DNS records

You can edit the *Value* provided below to to modify the DMARC policy you want to apply to your domain. Learn more

Type	Name	Value
TXT	_dmarc.compleohealth.com	"v=DMARC1; p=none;"
